Trips and Visits

Trips and visits are an important and enjoyable part of our learning in the Vision Support Service. Some trips are run by class teachers, being part of mainstream learning, others are organised specifically by the Vision Support Department, being run in small groups. Here are some of our favourites from the Summer term.

Out and About Days

Many of our Primary School students have been taking part in 'Out and About days' with the Vision Support Staff. This term Kieran (right) and Alfie (left) visited Millhouses park.

PRIMARY

"We really loved the water play area and the ice cream was delicious." Kieran.

Chester Zoo

Our Y7's took part in an exciting mainstream Science trip to Chester Zoo this term. They were looking specifically at animal habitats and adaptations. A highlight of the trip for our students was walking through the bat cave and feeling the bat's flying past!!

"I made a butterfly friend in the butterfly house!" Joe

Graves Park

SECONDARY

Our Vision Support Science group took part in a field trip to Graves Park this term. They were doing research on animal habitats for a project they are completing at school. Highlights included meeting Bernard the hand-reared Highland Bull calf and the two week old piglets!!

"I enjoyed looking at the fascinating animals"

Liam

Graves Park

National Emergency Services Museum

One of our post-16 students took part in a day trip to this exciting venue. She had the chance to touch and explore all of the equipment, even trying some of it on for size!!

"The museum was really interesting. I loved the fact that I could try on the outfits and climb on the equipment, this helped me to explore everything and understand how it works."

Kludia

POST-16
